New and Replacement Litter Bins

New and Replacement Litter Bins

On average, Street Scene get 180 requests a year for new and replacement litter bins - we consider each request carefully. When residents ask for a new litter bin, our first step is to monitor the street litter in that area for around two weeks. If this shows us that a bin is needed, we'll let residents know where we think it should be placed and give them time to share their views before we install it.

How we do it

Providing and fitting a bin is costly so we want to make sure it gets used. That's why we take care to consider the most suitable bin for the area and the best location. That way we make sure it's placed where people will find it easy to use.

Our litter bins are well used and emptied regularly, so you should soon see a difference in the amount of litter dropped in the area.

Litter bin for your area

A request has been made to fit a litter bin in your neighbourhood. We have monitored the litter in your area and agree a litter bin is needed.

How you can help

Encourage friends and neighbours to use the bin it can help to keep your streets clean and litter free.

Tell us if a bin in your area is full or overflowing and we'll empty it straight away.

Sometimes litter bins get damaged or vandalised, tell us and we'll repair or replace it. Unfortunately, bins are expensive to buy and install. If the damaged bin you're reporting has been vandalised many times before, we may decide not to replace it.

If you'd like to talk to someone about your litter bin please call 01902 551155.

Street Scene, what we're here for

We clean the city's public footways, roads and public open spaces. We also cut the grass and look after the planting beside our roads, in our parks and public open spaces.

Street Scene:

- Street Cleaning
- Fly Tip Removal
- Graffiti Removal
- Removing Dead Animals
- Grounds Maintenance
- Highways Trees
- Pest Control
- Gully Cleaning
- Out of Hours Emergency Call Out

How we do it

We employ specialised street cleaning teams, trained horticulturists and arboriculturists. We also work closely with Wolverhampton City Council's waste management partner, Enterprise Managed Services. Together, we deliver a clean and well maintained city environment for residents, businesses and visitors.
