

CITY OF WOLVERHAMPTON COUNCIL

Advice to Customer

To deal with rats/mice/insects in your premises the Council's Pest Control Officer has placed poison baits/or treated with insecticide in carefully selected points which should not be disturbed.

The poison used is approved for domestic and commercial use (e.g. houses, flats and schools) under the Control of Pesticides Regulations 1986. However, your co-operation is requested in adopting the following precautions to further minimise any risks to occupants and pets, and to ensure an effective treatment.

Precautions

- Avoid all contact by mouth
- Do not let children or pets, particularly dogs, have access to the bait
- In case of an accident, contact a doctor or veterinarian and show this leaflet
- Main a high standard of cleanliness. No not allow refuse to collect unnecessarily and clear surplus pet food after feeding. Do not feed birds in the garden as this may attract rodents.

The poison bait used on your premises is detailed below together with its active ingredient and antidote (Operator to tick relevant box)

Mice	Sorex D (Difenacoum) (Antidote - Vitamin K1)
Rats	Neosorex (Difenacoum) (Antidote—Vitamins K1)
Fleas	K-Ortherine (Deltamethrin) (Wash skin and treat symptomatically)
Cockroaches	Maxforce (w/w Imidacloprid) (wash skin. If ingested do not eat or drink anything and seek medical advice)
Wasps / Flying Insects	FICAM D (Dustable powder (DP) Bendiocarb 1,25 % w/w) (Wash skin and treat symptomatically)

COSHH sheets for these chemicals are held at City of Wolverhampton Council, Environmental Services, Hickman Avenue, Wolverhampton, WV1 2BY.
