<td>600 x 800</td>
<td>3 Deep</td>
</tr>
<tr>
<td>CU53</td>
<td>450 x 600</td>
<td>2 Deep</td>
</tr>
</tbody>
</table>

---

### NOTES

1. Chambers shall be surrounded with a simple concrete footing approx. 50 mm thick with a soakaway of 60 mm clean stone if required.

2. Chambers must be bedded on the concrete surround if positioned inside the top box section when the concrete is being laid. The frame must be bedded on the concrete surround and not the frame. If chambers surround a section cutting out to complete the joint, all access boxes and references are based on the current systems supplied by Cooper Clarke. All dimensions are in millimeters.
