

Safeguarding Activity

The total number of alerts received this year was 1600, a marked increase from last year which totalled 1308.

It is unclear why there has been such an in-crease in the number of alerts, although there has been an increase every year for the last three years. It may be attributed to the increased public awareness through media coverage and locally through safeguarding awareness raising sessions delivered on behalf of the Wolverhampton Safeguarding Adult Board and partner organisations.

Risks Removed

The result shows that in 94% of all cases where action is taken the risk is at least reduced with 26% of cases having the risk removed altogether. This is a very positive result and shows that safeguarding has been extremely effective.

An example of the positive impact that Safeguarding can have on a person's life:

David's Story

David was supported by the mental health team to monitor his mental health and prevent deterioration after he had had money stolen from him by a "friend" he had met online. The team also supported him to make changes to his social media site. His Housing Association provided him with added security to his front door. David decided to buy a small safe to keep his valuables in at .

David has remained well and been able to continue with his life in his local community.
