Funfair on Tettenhall Green

Request:

I would like to make some enquiries regarding the decision to install a funfair on Tettenhall Green this summer.

1. How much funding will this decision generate for the Council in terms of licencing for traders and fairground operators paying to take part?
2. How many stalls/rides will the funfair consist of and of what types?
3. How many people does the Council anticipate will use the funfair each day?
4. How much revenue is likely to be generated for the traders based on their typical charges?
5. Has a cost-benefit analysis been completed that takes into account the cost of clearing up the likely additional litter and damage to the green likely to be caused by vehicle access and additional footfall?
6. Has any analysis been completed regarding the likely impact of the funfair on trade for local retailers, positive or negative? If so, what was the conclusion?
7. Has any public consultation been undertaken? If so, what form did it take? If not, on what justification?
8. Could you please clarify the ownership of Tettenhall Green. Is the green common land, is it owned by the council, is it managed by the Council on behalf of the people of Wolverhampton/Tettenhall, or some other arrangement?

In response to your above questions, a decision was never made to install a funfair on Tettenhall Green as it was always a proposal and therefore we didn't enter into the above level of detail. The proposal was the first stage of public consultatation.
